

GPS Tracking & Communication

- Device Independent Platform Allows for Easy Integration of GPS Hardware
- UDP Communication
- SMS Communication
- Complete Google Map Integration
- Address Geocoding
- Routing
- Large Viewable Map Area

Application

- Intuitive User Interface
- Convenient Map Tools (Zoom, Pan, Measuring Tool, (Street View and more)
- Scalable Fleet Management
- Asset Grouping
- Landmarks/Point Of Interest
- Support Multiple Geofences
- User Settings and Personalization
- Announcement

Alerts

- Odd Hours Operation
- Vehicle Speeding
- Speeding within Geofence
- Enter/Exit Geofence
- Panic Button
- Hardware Custom Input & Output:
 - Temperature
 - Battery
 - Hook/Unhook
 - Vibration
 - Reed Sensor
 - Custom (40+ events)
- Vehicle Maintenance Reminder
- Alert Action Required Response

Account Administration

- Centralized and Intuitive Account Management
- Account Inactivity Feature (Handles temporary (account lockout)
- Private Labeling (Branding)
- Data Audit Tool

Reports & Data Export

- Reports including:
 - Fleet Activity
 - Fleet Daily
 - Fleet Hours Worked
 - Fleet History
 - Vehicle Maintenance
 - State Mileage
 - Speed Violation
 - Alerts
 - Hardware Events
 - Start & Stop Report
- Custom Reports Available
- Schedule and Email Report
- Data Export

International Support

- Multiple Language Support (language is automatically set based on user browser settings)
- Custom Maps Integration
- Custom Date/Time Format

Customization

- Easy Systems Integration
- Interface with the Development API
- Source Code Escrow Available
- Consulting Services

Technology and Security

- ASP.NET AJAX
- SQL Server 2005/2008
- SQL Reporting
- Integrated Security (Manage users, groups and resources)
- SSL Support
- Supports Load Balancing and Clustering
- Scalable Platform that will Handle Large Fleets
- Real-Time User Session Termination
- Failed Login Attempt

Support & Troubleshooting

- 24/7 Support Available
- Real Time Diagnostic Monitoring (View hardware messages real-time)
